

## SIERRA-12-RND

The Sierra series of LED Wall Lights features a high quality cast square or round aluminium frame powder coated in textured black, textured dark grey or textured white with either 3000K Warm White or 5000K dedicated LED Chips. However, the real benefit to the Sierra series lies with the adjustable integrated slides on the top and bottom of the luminaire allowing you to change the beam angle projected up and down the wall from 0° to 100° to give you that perfect v-line look on your wall for your home. With the additional benefit of being IP65 rated, the Sierra series of LED Wall lights can be placed both indoors and outdoors to create excellent up and down illumination for your contemporary home.
